Education

Caltech (2015-2019): BS in Mathematics, BS in Computer Science, and BS in Philosophy
GPA 3.6 overall; eight A+'s; only triple major in my graduating class; research in CS and philosophy; thesis in philosophy of physics; 14 physics courses, including 3 graduate-level courses; peer tutoring and teaching assistance in CS, math, writing, and physics

Research Experience

Stanford Existential Risk Initiative

ML Alignment Theory Scholars Program *adv. Krakovna* 6/23—9/23
Conducting research on power-seeking in the Markov Decision Process setting

California Institute of Technology

Undergraduate Projects in Computer Science *adv. Vanier* 4/19—6/19
With another student, investigated using AlphaZero-inspired tree search to prove theorems
Philosophy thesis *adv. Sebens* [Anthropic reasoning in infinite worlds](#) 9/18—6/19
Argued that another formalism for anthropic reasoning is less arbitrary than Bostrom's; addressed mathematical issues in infinite worlds; applied findings to spacetime dimensionality
Reading in Philosophy *adv. Eberhardt* 1/19—4/19
With another student, wrote two papers on topics in ethics and philosophy of mind
Summer Undergraduate Research Fellowship *adv. Winfree* 6/17—8/17
Implementation of randomized algorithms with stochastic chemical reaction networks

University of California, Berkeley

Linguistics Research Apprentice Practicum (Ling. 197) 1/15—5/15
Linguistic Typology (Ling. 222) 1/14—5/14

Professional Experience

Granica

Research Engineer 2/22—7/23
Used techniques including black box optimization, sketch algorithms, statistical modeling, Bayesian estimation, spectral clustering, gradient descent, integer linear programming, automated hyperparameter tuning, and singular value thresholding in data compression research
Software Engineer 2/21—2/22
Configured cloud infrastructure and developed tools for interfacing with infrastructure

Berkeley Existential Risk Initiative Research Assistant—Anders Sandberg 4/21—12/21

Provided assistance on a draft of Anders' upcoming book: checked physics derivations and facts and discussed the philosophical and scientific content in weekly one-on-one meetings

California Institute of Technology

Head Deans' Tutor, Calculus of One and Several Variables & Linear Algebra 9/18—6/19
Head Deans' Tutor, Classical Mechanics and Electromagnetism 4/18—6/18
Deans' Tutor, misc. math, physics, and computer science courses 9/16—6/19
Teaching Assistant: Fundamentals of Computer Programming, 4/18—3/19
Introduction to Discrete Mathematics, Principles of Biology
Peer Tutor, Hixon Writing Center 4/16—6/19
[Theorem](#) *Engineering Intern* 7/18—9/18
JPL Science Data Modeling and Computing Group *Intern* 7/16—9/16
